HAMATEUR CHATTER
The Milwaukee Radio Amateur's Club, Inc.
The World's Oldest Continuously Active Radio Amateur Club

CLUB CALL W9RH

The main reason for this summer edition of the MRAC newsletter is that membership is up for renewal at the end of August. See the form printed at the end. The next club meeting will be held in September. The time, date and place of the meeting will be published in the next edition. Amateur Radio Classes will begin on September 4, 1991. They will be held at Marquette Electronics, 8801 W. Fairy Chasm Rd. A flyer with detailed information will be available at Amateur Electronic Supply.

What was probably the last MRAC Field Day to be held at the old Nike site in Lannon occurred with only a couple of visits by Murphy. Ask Ed Wille how the Club's new beam went together. Those of you who did not visit the sight did not get a chance to see how drastically it has changed. The buildings are gone; the brush and debris have been cut back and cleared: and a large buried storage tank has been unearthed. Participation was even less than in previous years, but I was assured that all who showed up enjoyed themselves. Given the combin- ation of declining participation and the loss of the site, it is possible that next year, W9RH will not be on the air during Field Day. That's the news for this issue. Notice that it's kind of sparse. The reason for that is your editor has not received any articles from the membership. If you want to see things in here, SUBMIT THEM. My computer can take either disk size, both high and low density. Compatible text formats are WordStar, WordPerfect, Microsoft Word, Display Write, MultiMate and ASCII. Submissions on disk are much less work on this end and, for the most part, will let you say things in your own way. It also means that your submission will be more likely to make the next edition. Some editing may be necessary to save space or correct spelling and the like. If you want a newsletter with news and other informa tion, start getting it to the editor. I can't put in what I don't have, and I would think by now that you'd be getting a little tired of hearing only my ideas. Besides, pretty soon I'm going to start repeating myself even more than in the past. The ideas for what to include are few and far between. CU in September. KE9LL, Editor

MILWAUKEE AREA NET INFORMATION

TIME	DAY	FREQUENCY (MHz)	SUBJECT
9:00 PM	Monday	146.67	Milwaukee-Waukesha ARES
9:00 PM	Tuesday	145.13	MAARS Roundtable
